**Subject:** Wilcox Refinery

**Message:** Hello, My name is (b) (6), and I live in Bristow, Oklahoma, on the Wilcox refinery Superfund site. The church down the road from me has been told it would be in their best interest to move to a different location. I, with my wife (b) (6) and our 2 sons, (b) (6) who will be turn 5 this month, and (b) (6) who is 2. We understand that the water has high levels of lead in it. We do not drink it, but it is our primary use of water. We have several spots on our land that has the tar-like sludge spots. They are very nasty, it keeps us from having livestock

9828790

on the land, have to be careful with our kiddos and pets to keep them out of it. I am trying to get some information. I love where we reside, but I also do not want it to possibly be a hazardous health issue to my family. I am not in a position where I can just pack up and move. Let alone, there is no possible way that anyone would buy my house. Any information would be helpful. Thank you and have a great day.

(b) (6)
